

# HIV PREVENTION in Louisiana

Since the late 1980s, CDC has partnered with state and local health departments to expand the impact and reach of its HIV prevention activities.

CDC awarded **\$13.2M** in FY2024 to health departments and community-based organizations in Louisiana for HIV prevention and care activities, including **\$3.8M** in *Ending the HIV Epidemic (EHE)* funding.

CDC collects and disseminates data on **6 key indicators**. Current data are available online at [AtlasPlus](#)\* and on [HHS AHEAD](#)<sup>†</sup> for each jurisdiction.

**25,500**  
people are  
living with  
HIV in  
Louisiana.

In Louisiana between 2018 and 2022, overall HIV incidence **decreased** by **23%**, preventing an estimated **470 new HIV infections** and saving **\$260.4M** in lifetime medical costs.

## DIAGNOSE all people with HIV as early as possible

### Knowledge of Status (2022)

Across the country,

**87.2%**

of people living with HIV **were aware of their status**, meaning approximately **12.8% were unaware** and are not getting the HIV care they need.

**84.8%**

of Louisianians with HIV were **aware of their status**, meaning approximately **15.2% were unaware** and are not getting the HIV care they need.

### Self-Testing

CDC is providing free HIV self-test kits to populations disproportionately affected by HIV. CDC and partners have sent out over **750,000** tests.

**99,102**

HIV tests were provided in Louisiana with CDC funding.

## How CDC Dollars Are Improving Diagnosis

- **Expanding** routine screening of people in health care settings, including emergency departments
- **Increasing** testing in non-clinical settings (e.g., jails, community serving organizations, street-based services)
- **Increasing** access to and use of HIV self-tests
- **Integrating** sexually transmitted infections (STI) and viral hepatitis screening into HIV testing services

<sup>†</sup> <https://ahead.hiv.gov/>

## TREAT people with HIV rapidly and effectively to reach sustained viral suppression

### Viral Suppression (2022)

**65.1%**

of people across the country, with diagnosed HIV, **were virally suppressed.**

**70.2%**

of Louisianians, with diagnosed HIV, **were virally suppressed.**

### How CDC Dollars Are Improving Treatment

- **Expanding** access to rapid HIV treatment including long-acting injectables
- **Linking** people with HIV to care within one month to facilitate rapid access to HIV medicine
- **Integrating** HIV, STI, and hepatitis treatment to provide efficient and cost-effective care

## PREVENT

new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP)

### PrEP

**PrEP is a medicine** that people at risk for HIV take to prevent getting HIV from sex or injection drug use.

Louisiana's CDC-funded HIV testing programs identified **17,146 persons who were eligible** for PrEP in 2022.

### How CDC Dollars Are Improving Prevention

- **Expanding** access to PrEP through innovations such as long-acting injectable PrEP, Post-Exposure Prophylaxis, and focused provider education
- **Implementing** a whole-person approach to HIV prevention and care to help overcome barriers

## RESPOND early to potential HIV clusters or outbreaks

Cutting-edge public health approaches turn HIV data into action by **identifying areas with rapid transmission and expanding resources** to maximize prevention and treatment efforts.

**404**

**clusters of HIV infections** reported to CDC from 2022 through 2024.

### How CDC Dollars Are Improving Response

- **Addressing** gaps in prevention and care contributing to rapid transmission
- **Engaging** communities and partners to respond to outbreaks
