

Wellington Injury Forum and ICE Meeting 2012

Welcome and overview

Ronan Lyons

Chair, ICE

Acknowledgements

- Anna McDowell and Stats NZ team for sponsoring the Wellington Injury Forum meeting
- Pauline Gulliver for her tremendous work in organising the meeting even though she knew she could not attend
- Kingsgate Hotel staff
- Belinda, Kirsten and Pauline for organising speakers

Why a joint meeting?

- Number of groups with very similar interests and cross-involvement or membership
- Some organisations/individual cannot cope with even a limited attendance fee
- We wish to be inclusive and hence joint injury fora/ICE/other group meetings is a pragmatic solution
 - More about transparency, democracy and membership tomorrow
- Wish to acknowledge the contribution of the host city
 - so in 2012 we have
 - Wellington Injury Forum
 - London Olympics

Injury ICE

- Long history. Purpose, structure and membership concepts revised in 2012
 - More tomorrow
- International Collaborative Effort on Injury Statistics **and Methods (Injury ICE)** is an organisation dedicated to developing common standardised methods to compare injury statistics across the globe in order to support appropriate policy responses to the global burden of injury.
- Membership is open to all who share this vision
- Participation is particularly encouraged from individuals who are willing to engage in core areas of activity and help organise future ICE/Injury Fora meetings, and especially from those who can contribute data and analyses and engage in multi-national collaborative projects.

Final Agenda

DAY ONE SATURDAY 29thSEP 2012

- Welcome and overview **9-9:30 Ronan Lyons**
- **ICD-11 9.30-10.30 Chair: James Harrison**
