SECTION 2 - LOCAL AREA STATISTICS - PAGE 16

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 17

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 18

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 19

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 20

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 21

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |     |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 22

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 23

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 24

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child         | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 25

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child   | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 26

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child        | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child    | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 27

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 28

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 30

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 31

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 32

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 33

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 34

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 35

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child                | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 36

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 37

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   |    |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 38

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 39

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 41

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child    | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child       | Total births by county of occurrence | Births by place of residence |                          |                                   |  |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 42

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child      | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child   | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 43

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 44

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 45

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 46

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child        | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 47

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child                               | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child          | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 48

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 49

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 50

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 51

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 52

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 53

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child               | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child              | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 54

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |        |        |     |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 55

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child     | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 56

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 57

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 58

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 59

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 60

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 61

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 62

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |     |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 63

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 64

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child      | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 65

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 66

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child      | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child            | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 67

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 68

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 69

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 70

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child   | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 71

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 72

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 73

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child     | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 74

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child    | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child     | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 75

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                          |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 76

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 77

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 78

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 79

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 80

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child              | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 81

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                          |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 82

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 83

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 84

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 85

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more]

| Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   | Area and race of child  | Total births by county of occurrence | Births by place of residence |                   |                                   |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 86

Table 2-1. Live Births by Place of Delivery and Race of Child: United States, Each State and County, and Specified Urban Places of 10,000 or More, 1988—Con.

[Small figures should be used with caution; see Technical Appendix. Urban places are those with populations of 10,000 or more in 1980 and are incorporated unless otherwise noted. Figures are shown by race for those counties and urban places in which the 1980 populations for the "All other" group formed 10 percent of the total population of the area or numbered 10,000 or more.]

<sup>1</sup> Includes all births in hospitals, institutions, and clinics; see Technical Appendix.

<sup>2</sup> Areas shown are census areas, the nearest equivalent of counties.

<sup>3</sup> Includes data for La Paz which became a new county on January 1, 1983.

<sup>4</sup> Includes data for Texarkana, Ark., only.

<sup>5</sup> Data coded by Connecticut did not identify the incorporated city of Willimantic and are included in Balance of county. Any figures shown are for births occurring in other States.

<sup>6</sup> Areas shown are parishes which are county equivalents.

<sup>7</sup> Includes data for Bristol, Tenn., only.

<sup>8</sup> Includes data for Texarkana, Tex., only.

<sup>9</sup> Independent city having population of less than 10,000 according to the 1980 census.

<sup>10</sup> Includes data for Bristol, Va., only.

<sup>11</sup> Includes data for Bluefield, W. Va., only.

# Classified as urban under special rule; see Technical Appendix.

SECTION 2 - LOCAL AREA STATISTICS - PAGE 87

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 88

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|

SECTION 2 - LOCAL AREA STATISTICS - PAGE 89

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>a</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|

SECTION 2 - LOCAL AREA STATISTICS - PAGE 90

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|
|                                     |              | In hospital <sup>3</sup>                  |           |         |       | Not in hospital <sup>4</sup> |           |         |       | Less than 2,500 grams     | 2,500 grams or more | Not stated |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 91

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 92

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|

SECTION 2 - LOCAL AREA STATISTICS - PAGE 93

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix.]

SECTION 2 - LOCAL AREA STATISTICS - PAGE 94

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|

SECTION 2 - LOCAL AREA STATISTICS - PAGE 95

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|

SECTION 2 - LOCAL AREA STATISTICS - PAGE 96

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child *       | Total births | Births by attendant and place of delivery |           |         |       |                   |           |         |       | Birth weight *        |                     |            |
|--------------------------------|--------------|---|-----------|---------|-------|-------------------|-----------|---------|-------|-----------------------|---------------------|------------|
|                                |              | In hospital *                             |           |         |       | Not in hospital * |           |         |       | Less than 2,500 grams | 2,500 grams or more | Not stated |
|                                |              | Total *                                   | Physician | Midwife | Other | Total *           | Physician | Midwife | Other |                       |                     |            |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 97

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|
|                                     |              | In hospital <sup>3</sup>                  |           |         |       | Not in hospital <sup>4</sup> |           |         |       | Less than 2,500 grams     | 2,500 grams or more | Not stated |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 98

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix.]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 99

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix.]

| Area and race of child *       | Total births | Births by attendant and place of delivery |           |         |       |                   |           |         |       | Birth weight *        |                     |            |
|--------------------------------|--------------|---|-----------|---------|-------|-------------------|-----------|---------|-------|-----------------------|---------------------|------------|
|                                |              | In hospital *                             |           |         |       | Not in hospital * |           |         |       | Less than 2,500 grams | 2,500 grams or more | Not stated |
|                                |              | Total *                                   | Physician | Midwife | Other | Total *           | Physician | Midwife | Other |                       |                     |            |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 100

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix.]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 101

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|
|                                     |              | In hospital <sup>3</sup>                  |           |         |       | Not in hospital <sup>4</sup> |           |         |       | Less than 2,500 grams     | 2,500 grams or more | Not stated |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 102

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |

SECTION 2 - LOCAL AREA STATISTICS - PAGE 103

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix.]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>2</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|

SECTION 2 - LOCAL AREA STATISTICS - PAGE 104

Table 2-2. Live Births by Attendant and Place of Delivery and by Birth Weight, by Race of Child, for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1988—Con.

[Urban places in metropolitan counties are those with populations of 10,000 or more in 1980; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000 in 1980. For definition of areas see Technical Appendix]

| Area and race of child <sup>1</sup> | Total births | Births by attendant and place of delivery |           |         |       |                              |           |         |       | Birth weight <sup>5</sup> |                     |            |
|-------------------------------------|--------------|---|-----------|---------|-------|------------------------------|-----------|---------|-------|---------------------------|---------------------|------------|
|                                     |              | In hospital <sup>2</sup>                  |           |         |       | Not in hospital <sup>4</sup> |           |         |       | Less than 2,500 grams     | 2,500 grams or more | Not stated |

<sup>1</sup> Totals for geographic areas include races other than white and black.  
<sup>2</sup> Includes all births in hospitals, institutions, and clinics and births occurring en route to or on arrival at these facilities.  
<sup>3</sup> Includes births attended by unspecified persons which are not shown separately.  
<sup>4</sup> Includes births with place of delivery not stated.  
<sup>5</sup> Equivalent of 2,500 grams is 5 lb 8 oz.  
<sup>6</sup> Includes data for Brick Township and Dover Township (Ocean County), New Jersey, which had 1980 populations of 53,629 and 64,455, respectively. Ocean County is not designated as metropolitan.  
<sup>7</sup> County equivalents.

## Section 3. Puerto Rico, the Virgin Island (U.S.), and Guam

| Table   | Page |
|---|------|
| 3-1. Live births and birth rates: Puerto Rico and Virgin Islands, 1940-88; and Guam, 1970-88 -----  | 1    |
| 3-2. Live births by month for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----   | 2    |
| 3-3. Live births by age of mother and live-birth order for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----                      | 3    |
| 3-4. Live births by age of father and sex of child for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----                          | 4    |
| 3-5. Live births by age of mother and educational attainment of mother: Puerto Rico, Virgin Islands, and Guam, 1988 -----   | 5    |
| 3-6. Live births by live-birth order and educational attainment of mother: Puerto Rico, Virgin Islands, and Guam, 1988 -----  | 6    |
| 3-7. Number and ratio of births to unmarried women, by age of mother for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----        | 7    |
| 3-8. Median birth weight and live births by birth weight for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----                    | 8    |
| 3-9. Live births by month of pregnancy prenatal care began and birth weight for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 ----- | 9    |
| 3-10. Live births by place of delivery: Puerto Rico and each municipio, 1988 -----  | 10   |
| 3-11. Live births by place of delivery and race of child: Virgin Islands by Island and specified urban place, and Guam, 1988 -----  | 11   |
| 3-12. Live births by period of gestation for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----                                    | 12   |
| 3-13. Live births by number of prenatal visits for Puerto Rico, Virgin Islands, and Guam; and by race of child for Virgin Islands and Guam: 1988 -----                              | 13   |
| 3-14. Live births by 1- and 5-minute Apgar scores for Puerto Rico and Guam; and by race of child for Guam: 1988 -----   | 14   |

**SECTION 3 - PUERTO RICO, VIRGIN ISLANDS (U.S.), AND GUAM - PAGE 1**

**Table 3-1. Live Births and Birth Rates: Puerto Rico and Virgin Islands, 1940-1988; and Guam, 1970-1988**

[Rates per 1,000 total population in each area except as noted. Beginning 1970 excludes births to nonresidents of each area]

| Year              | Puerto Rico |      | Virgin Islands |      | Guam   |      |

<sup>1</sup> Marital status of the parents is reported in three categories: legally married; not legally married and living together ("consensually married"); and not legally married and not living together. Births to unmarried women include births to women in the latter two categories.

<sup>2</sup> Based on fewer than 20 total births.

**SECTION 3 - PUERTO RICO, VIRGIN ISLANDS (U.S.), AND GUAM - PAGE 8**

Table 3-8. Median Birth Weight and Live Births by Birth Weight for Puerto Rico, Virgin Islands, and Guam; and by Race of Child for Virgin Islands and Guam: 1988

## DEFINITION OF LIVE BIRTH

Every product of conception that gives a sign of life after birth, regardless of the length of the pregnancy, is considered a live birth. This concept is included in the definition set forth by the World Health Organization (1):

Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered liveborn.

This definition distinguishes in precise terms a live birth from a fetal death (see section on fetal deaths in the Technical Appendix of Volume II of this report). In the interest of comparable natality statistics, both the Statistical Commission of the United Nations and the National Center for Health Statistics have adopted this definition (2,3).

## HISTORY OF BIRTH-REGISTRATION AREA

The national birth-registration area was proposed in 1850 and established in 1915. By 1933 all 48 States and the District of Columbia were participating in the registration system. The organized territories of Hawaii and Alaska were admitted in 1929 and 1950, respectively; data from these areas were prepared separately until they became States—Alaska in 1959 and Hawaii in 1960. At present the birth-registration system of the United States covers the 50 States, the District of Columbia, the independent registration areas of New York City, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands. However, in the statistical tabulations, "United States" refers only to the aggregate of the 50 States (including New York City) and the District of Columbia. Tabulations for Puerto Rico, the Virgin Islands, and Guam are shown separately in section 3 of this volume.

The original birth-registration area of 1915 consisted of 10 States and the District of Columbia. The growth of this area is indicated in table 4-1. This table also presents for each year through 1932 the estimated midyear population of the United States and of those States included in the registration system.

Because of the growth of the area for which data have been collected and tabulated, a national series of geographically comparable data before 1933 can be obtained only

by estimation. Annual estimates of births have been prepared by P.K. Whelpton for the period 1909-34 (4) (table 1-1). These estimates include adjustments for under-registration and for States that were not part of the birth-registration area before 1933.

## SOURCES OF DATA

### Natality statistics

Since 1985, natality statistics for all States and the District of Columbia have been based on information from the total file of records. The information is received on computer data tapes coded by the States and provided to the National Center for Health Statistics (NCHS) through the Vital Statistics Cooperative Program. NCHS receives these tapes from the registration offices of all States, the District of Columbia, and New York City. Information for Puerto Rico is also received on computer tapes through the Vital Statistics Cooperative Program. Information for the Virgin Islands and Guam is obtained from microfilm copies of original birth certificates, and is based on the total file of records for all years.

Birth statistics presented in this report for years before 1951 and for 1955 are based on the total file of birth records. Statistics for 1951-54, 1956-66, and 1968-71 are based on 50-percent samples, with the exception of data for Guam and the Virgin Islands, which are based on all records filed. During the processing of the 1967 data, the sampling rate was reduced from 50 to 20 percent. For details of this procedure and its consequences for the 1967 data, see *Vital statistics of the United States, 1967*, volume I, pages 3-9 to 3-11. From 1972 to 1984, statistics are based on all records filed in the States submitting computer tapes and on a 50-percent sample of records in all other States.

Information for years prior to 1970 for Puerto Rico, the Virgin Islands, and Guam is published in the annual vital statistics reports of the Department of Health of the Commonwealth of Puerto Rico, the Department of Public Health of the Virgin Islands, the Department of Public Health and Social Services of the Government of Guam, and in selected *Vital statistics of the United States* annual reports.

U.S. natality data are limited to births occurring within the United States, including those occurring to U.S. residents and nonresidents. Births to nonresidents of the United States have been excluded from all tabulations by place of residence beginning in 1970. (See "Classification by occurrence and residence" for further discussion.) Births occurring to U.S. citizens outside the United States are not included in any tabulations in this report. Similarly, the data for Puerto Rico, the Virgin Islands, and Guam are limited to births registered in these areas.

SECTION 4 — TECHNICAL APPENDIX — PAGE 2

Standard Certificate of Live Birth

The U.S. Standard Certificate of Live Birth, issued by the Public Health Service, has served for many years as the principal means of attaining uniformity in the content of the documents used to collect information on births in the United States. It has been modified in each State to the extent required by the particular State's needs or by special provisions of the State's vital statistics law. However, most State certificates conform closely in content to the standard certificate.

The first standard certificate of birth was developed in 1900. Since then it has been revised periodically by the national vital statistics agency through consultation with State health officers and registrars; Federal agencies concerned with vital statistics; national, State, and county medical societies; and others working in the fields of public health, social welfare, demography, and insurance. This procedure

has assured careful evaluation of each item for its current and future usefulness for legal, medical, demographic, and research purposes. New items have been added when necessary, and old items have been modified to ensure better reporting or, in some cases, dropped when their usefulness appeared to be limited.

1978 revision—Effective January 1, 1978, a revised U.S. Standard Certificate of Live Birth (figure 4-A) replaced the 1968 revision. Changes on the 1978 standard certificate include a new item on 1- and 5-minute Apgar scores, the deletion of the item on birth injuries, and revisions of the items on legitimacy status and previous pregnancies.

The item on legitimacy status was changed to read "Is mother married?" This is now a factual piece of information about the mother rather than an attribute ascribed to the child, and the person completing the record does not have the responsibility for making what may be a legal determination.

FETAL DEATH(S)

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE—PUBLIC HEALTH SERVICE—NATIONAL CENTER FOR HEALTH STATISTICS  
1978 REVISION

HRA-161  
Rev. 1/78

The item on previous deliveries was changed to pregnancy history and expanded to include two categories of fetal loss: before and after 20 completed weeks of gestation. This change provides information on two groups that are of interest in medical research and emphasizes the fact that all previous fetal losses should be included, both spontaneous and induced, regardless of length of gestation. For further discussion, see individual sections for each item.

### CLASSIFICATION OF DATA

One of the principal values of vital statistics data is realized through the presentation of rates computed by relating the vital events of a class to the population of a similarly defined class. Vital statistics and population statistics, therefore, must be classified according to similarly defined systems and tabulated in comparable groups. Even when the variables common to both, such as geographic area, age, race, and sex, have been similarly classified and tabulated, differences between the enumeration method of obtaining population data and the registration method of obtaining vital statistics data may result in significant discrepancies.

The general rules used to classify geographic and personal items for live births are set forth in "Vital Statistics Classification and Coding Instructions for Live Birth Records, 1988," *NCHS Instruction Manual*, Part 3a. The classification of certain important items is discussed in the following pages.

#### Classification by occurrence and residence

All but three tabulations for States and other areas within the United States are by place of mother's residence. These three tabulations (1-49, 1-50, and 2-1) show births by place of occurrence. Births to U.S. residents occurring outside this country are not reallocated to the United States. In tabulations by place of residence, births occurring within the United States to U.S. citizens and to resident aliens are allocated to the usual place of residence of the mother in the United States as reported on the birth certificate. Beginning in 1970, births to nonresidents of the United States occurring in the United States are excluded from these tabulations. From 1966 to 1969, births occurring in the United States to mothers who were nonresidents of the United States were considered as births to residents of the exact place of occurrence; in 1964 and 1965 all such births were allocated to "balance of county" of occurrence even if the birth had occurred in a city. The change in coding beginning in 1970 to exclude births to nonresidents of the United States from residence data significantly affects the comparability of data with years before 1970 only for Texas.

For the total United States the tabulations by place of residence and by place of occurrence are not identical. Births to nonresidents of the United States are included

in data by place of occurrence but excluded from data by place of residence, as previously indicated.

*Residence error*—A nationwide test of birth-registration completeness in 1950 provided measures of residence error for natality statistics. According to this test, errors in residence reporting for the country as a whole tend to overstate the number of births to residents of urban areas and to understate the number of births to residents of other areas. This tendency has assumed special importance because of a concomitant development—the increased utilization of hospitals in cities by residents of nearby places—with the result that a number of births are erroneously reported as having occurred to residents of urban areas. Another factor that contributes to this overstatement of urban births is the customary procedure of using "city" addresses for persons living outside the city limits.

*Incomplete residence*—Beginning in 1973, when only the State of residence is reported with no city or county specified and the State named is different from the State of occurrence, the birth is allocated to the largest city of the State of residence. Before 1973 such births were allocated to the exact place of occurrence.

#### Geographic classification

The rules followed in the classification of geographic areas for live births are contained in the instruction manual mentioned previously. The geographic code structure for 1988 is given in another manual, "Vital Records Geographic Classification, 1982."

*United States*—In the statistical tabulations, "United States" refers only to the aggregate of the 50 States and the District of Columbia. Alaska has been included in the U.S. tabulations since 1959 and Hawaii since 1960.

*Standard metropolitan statistical areas*—The standard metropolitan statistical areas (SMSA's) used in this report are those established by the U.S. Office of Management and Budget (5) from final 1980 census population counts and used by the U.S. Bureau of the Census, except in the New England States.

Except in the New England States, an SMSA is a county or a group of contiguous counties containing either a city of 50,000 inhabitants or more or an urbanized area of 50,000 with a total metropolitan population of at least 100,000. In addition to the county or counties containing such a city or urbanized area, contiguous counties are included in an SMSA if, according to specified criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city or urbanized area (6).

In the New England States the U.S. Office of Management and Budget uses towns and cities rather than counties as geographic components of SMSA's. The National Center for Health Statistics cannot, however, use the SMSA classification for these States because its data are not coded to identify all towns. Instead, the New England County Metropolitan Areas (NECMA's) are used. These areas are established by the U.S. Office of Management and Budget (7) and are made up of county units.

*Metropolitan and nonmetropolitan counties*—Independent cities and counties included in SMSA's or NECMA's are included in data for metropolitan counties; all other counties are classified as nonmetropolitan.

*Population-size groups*—Beginning in 1982 vital statistics data for cities and certain other urban places have been classified according to the population enumerated in the 1980 Census of Population. Data are available for individual cities and other urban places of 10,000 or more population. Data for the remaining areas not separately identified are shown in the tables under the heading "Balance of area" or "Balance of county." Classification of areas for the years 1970–81 was determined by the population enumerated in the 1970 Census of Population. As a result of changes in the enumerated population between 1970 and 1980, some urban places identified in previous reports are no longer included, and a number of other urban places have been added.

Urban places other than incorporated cities for which vital statistics data are shown in this report include the following:

- Each town in New England, New York, and Wisconsin and each township in Michigan, New Jersey, and Pennsylvania that had no incorporated municipality as a subdivision and had either 25,000 inhabitants or more or a population of 10,000 to 25,000 and a density of 1,000 persons or more per square mile.
- Each county in States other than those indicated above that had no incorporated municipality within its boundary and had a density of 1,000 persons or more per square mile. (Arlington County, Virginia, is the only county classified as urban under this rule.)
- Each place in Hawaii with 10,000 or more population. (There are no incorporated cities in Hawaii.)

#### Race or national origin

The race or national origin shown in a tabulation is that of the newborn child. Classification of the child's race or national origin for statistical purposes is based on the race or national origin of the parents. The categories are "White," "Black," "American Indian," "Chinese," "Japanese," "Hawaiian," "Filipino," "Other Asian or Pacific Islander," and "Other." Before 1978 the category "Other Asian or Pacific Islander" was not identified separately but included with "Other" races. The separation of this category allows identification of the category "Asian or Pacific Islander" by combining the new category "Other Asian or Pacific Islander" with Chinese, Japanese, Hawaiian, and Filipino.

If the parents are of different races or national origins, the following rules are used to assign race or national origin to the newborn child. When only one parent is white, the child is assigned the other parent's race or national origin. When neither parent is white, the child is assigned the father's race or national origin with one exception; if either parent is Hawaiian or part-Hawaiian, the child is assigned

to Hawaiian. If race is missing for one parent, the child is assigned the race of the parent for whom race is given. When information on race is missing for both parents, the race of the child is considered not stated and the birth is allocated according to rules discussed in the section "Race or national origin not stated."

*White*—The category "White" comprises births reported as white and births where race is reported as Hispanic. Before 1964, all births for which race or national origin was not stated were classified as white. Beginning in 1964, changes in the procedures for allocating race when race or national origin is not stated have changed the composition of this category. (See discussion on "Race or national origin not stated.")

*All other*—The category "All other" comprises black, American Indian, Chinese, Japanese, Hawaiian and part-Hawaiian, Filipino, other Asian or Pacific Islander including Asian Indian, and "Other." Aleuts and Eskimos are included in "American Indian."

If the race or national origin of an Asian parent is ill-defined or not clearly identifiable with one of the categories used in the classification (for example, if "Oriental" is entered), an attempt is made to determine the specific race or national origin from the entry for place of birth. If the birthplace is China, Japan, or the Philippines, the parent's race is assigned to that category. When race cannot be determined from birthplace, it is assigned to the category "Other Asian or Pacific Islander."

*Race or national origin not stated*—The race of a child is considered not stated in those cases in which information for both parents is missing. Before 1964 all such cases were tabulated as white. From 1964 to 1968 the race of the child was allocated by the computer as follows: If the race on the preceding record was white, the assignment was to white; otherwise the assignment was to black. Beginning in 1969 the race of the child has been allocated electronically according to the specific race of the child on the preceding record. Consequently, some of the not-stated frequencies that had previously been assigned to the black category may now be assigned to one of the other race or national origin categories.

Nearly all statistics by race or national origin for the United States as a whole in 1962 and 1963 are affected by a lack of information for New Jersey, which did not report parents' race in those years. Birth rates by race for those years are computed on a population base that excludes New Jersey. (For the method of estimating the U.S. population by age, sex, and race excluding New Jersey in 1962 and 1963, see *Vital statistics of the United States, 1963*, volume I, page 4–8.) Estimates of births to unmarried mothers by race for the United States, which include special estimates for New Jersey for 1962 and 1963, have been prepared and are shown in table 1–31.

*Interracial parentage*—Because of interracial parentage, the number of births for each racial or national origin group classified according to the child's race by the preceding rules differs from the number of births classified according to the mother's race. For white and black births, the differ-

ences are relatively small. In 1988 there were 1.8 percent more white mothers than there were births classified as white and 5.0 percent fewer black mothers than births classified as black. The number of mothers of other racial and national origin groups was considerably lower than the number of births classified according to the child's race: American Indian, 19.2 percent; Chinese, 6.8 percent; Japanese, 17.5 percent; Hawaiian, 31.6 percent; Filipino, 5.8 percent; Other Asian and Pacific Islander, 7.8 percent; and "Other," 15.4 percent.

### Age of mother

The birth certificate asks for "Age (at time of this birth)." The age of the mother is edited for upper and lower limits. When mothers are reported to be under 10 years of age or 50 years and over, the age of the mother is considered not stated and is assigned as described below.

Age-specific birth rates shown in this report are based on populations of women by age, which are prepared by the U.S. Bureau of the Census. In census years the decennial census counts are used. In intercensal years, estimates of the population of women by age are published by the U.S. Bureau of the Census in *Current population reports*.

The 1980 Census of Population derived age in completed years as of April 1, 1980, from the responses to questions on age at last birthday and month and year of birth, with the latter given preference. In the 1960 and 1970 censuses, age was also derived from month and year of birth. "Age in completed years" was asked in censuses before 1960. This was nearly the equivalent of the birth certificate question, which the 1950 test of matched birth and census records confirms by showing a high degree of consistency in the reporting of age in these two sources (8).

*Median age of mother*—Median age is the value that divides an age distribution into two equal parts, one-half of the values being less and one-half being greater. Median ages of mothers for 1960 to the present have been computed from birth rates for 5-year age groups rather than from birth frequencies. This method eliminates the effects of changes in the age composition of the childbearing population over time. Changes in the median ages from year to year thus can be attributed solely to changes in the age-specific birth rates.

*Not stated age of mother*—Beginning in 1964 birth records with age of mother not stated have been allocated according to the age appearing on the record previously processed for a mother of identical race and having the same total-birth order (total of fetal deaths and live births). In 1963, birth records with age not stated were allocated according to the age appearing on the record previously processed for a mother of identical race and parity (number of live births). For 1960–1962, ages not stated were distributed in proportion to the known ages for each racial group. Before 1960 this was done for age-specific birth rates but not for the birth frequency tables, which showed a separate category for age not stated.

### Age of father

Age of father is coded as stated on the birth certificate. If the age is under 10 years, it is considered not stated and grouped with those cases for which age is not stated on the certificate. Information on father's age is often missing on birth certificates of children born to unwed mothers, greatly inflating the number of "not stated" in all tabulations by age of father. In computing birth rates by age of father, births tabulated as age of father not stated are distributed in the same proportions as births with known age within each 5-year age classification of the mother. This procedure is done separately by race. The resulting distributions are summed to form a composite frequency distribution which is the basis for computing birth rates by age of father. This procedure avoids the distortion in rates that would result if the relationship between age of mother and age of father were disregarded.

### Live-birth order and parity

Birth order and parity classifications shown in this volume refer to the total number of live births the mother has had including the 1988 birth. Fetal deaths are excluded.

Birth order indicates what number the present birth represents; for example, a baby born to a mother who has had two previous live births (even if one or both are not now living) has a birth order of three.

Parity indicates how many live births a mother has had. Before delivery, a mother having her first baby has a parity of zero and a mother having her third baby has a parity of two. After delivery the mother of a baby who is a first live birth has a parity of one and the mother of a baby who is a third live birth has a parity of three.

Birth order and parity are determined from two items on the birth certificate, "Live births—now living" and "Live births—now dead."

*Not stated birth order*—Before 1969 if both of these items were blank, the birth was considered a first birth. Beginning in 1969, births for which the pregnancy history items were not completed have been tabulated as birth order not stated. As a result of this revised procedure, 22,686 births in 1969 that would have been assigned to the "First birth order" category under the old rules were assigned to the "Not stated" category.

All births tabulated in the "Not stated birth order" category are excluded from the computation of percents. In computing birth rates by live-birth order, births tabulated as birth order not stated are distributed in the same proportion as birth of known live-birth order.

### Dates of last live birth and last fetal death

Date of last live birth and date of last fetal death were added to the U.S. Standard Certificate of Live Birth in 1968 for the purpose of providing information on child spacing and pregnancy intervals. Tabulations of these items were

## SECTION 4 — TECHNICAL APPENDIX — PAGE 6

presented for the first time in 1969. In 1978 the item "Date of last fetal death" was reworded to "Date of last other termination" to ensure inclusion of both spontaneous fetal deaths and induced terminations of pregnancy. In 1988 this information was obtained from all States except Texas.

### *Intervals since last live birth and last other termination—*

These data are computed from the date of birth, date of last live birth, and date of last other termination. The interval since last live birth is the difference between the date of last live birth and the date of present birth; the interval since last other termination is the difference between the date of last other termination and the date of present birth. For an interval to be computed, both the month and year of the last live birth or the last other termination must be valid. These intervals are computed only for events to mothers who have had at least one previous delivery.

Births for which the interval since last live birth or last other termination is not stated are excluded from the computation of percents and means.

*Interval since last pregnancy and outcome of last pregnancy—*These data are derived from the computed intervals since the last live birth and the last other termination.

Before 1982, the outcome of the last pregnancy was considered not stated if the interval since either the last live birth or the last fetal death was not computed because only the year of the event was recorded. Beginning in 1982, the outcome of the last pregnancy was derived for such records if the year of the last live birth and the year of the last fetal death were not the same. The effect of this revised procedure is to reduce substantially the number of records with outcome of last pregnancy not stated.

In addition, for such records, the interval since the termination of the last pregnancy was determined if both the month and year were reported for the event immediately preceding the current live birth. Before 1982, the interval since the termination of the last pregnancy was considered not stated for such births.

Births for which the interval since last pregnancy is not stated are excluded from the computation of percents and means.

*Zero interval—*An interval of zero months since the last live birth or fetal death indicates the second born of a set of twins, the second or third born of a set of triplets, and so forth. Births with an interval of zero months are excluded from the computation of mean intervals.

### **Educational attainment**

Data on the educational attainment of both parents were collected beginning in 1968 and tabulated for publication in 1969 for the first time. In 1988, data on education were obtained from 46 States, the District of Columbia, and New York City as indicated in table A.

The educational attainment of either parent is defined as "the number of years of school completed." Only those years completed in "regular" schools, that is, a formal educational system of public schools or the equivalent in accredited private or parochial schools, are counted. Business or trade

schools, such as beauty and barber schools, are not considered "regular" schools for the purposes of this item. No attempt has been made to convert years of school completed in foreign school system, ungraded school systems, and so forth, to equivalent grades in the American school system. Such entries are included in the category "Not stated."

Persons who have completed only a partial year in high school or college are tabulated as having completed the highest preceding grade. For those certificates on which a specific degree is stated, years of school completed is coded to the level at which the degree is most commonly attained; for example, persons reporting B.A., A.B., or B.S. degrees are considered to have completed 16 years of school.

*Education not stated—*The category "Not stated" includes all records in reporting areas for which there is no information on years of school completed as well as all records for which the information provided is not compatible with coding specifications.

Births tabulated as education not stated are excluded from the computations of percents.

### **Marital status**

Beginning with 1980 data, national estimates of births to unmarried women are derived from two sources. For 42 States and the District of Columbia, marital status of the mother was reported directly on the birth certificate in 1988 (see table A); for the remaining 8 States that lack this item, marital status was inferred from a comparison of the child's and parents' surnames. This procedure represents a substantial departure from the previous method used to prepare national estimates, which assumed that the incidence of births to unmarried women in States with no direct question on marital status was the same as the incidence in reporting States in the same geographic division. Ratios of births to unmarried women were computed by race for the reporting States in each geographic division, applied to all births in the division, and then summed to obtain national estimates by race. The figures by race were summed to yield the totals for the United States.

The new method attempts to use related information on the birth certificate to improve the quality of national data on this topic, as well as to provide data for the individual nonreporting States. Beginning in 1980, a birth in a nonreporting State is classified as occurring to a married woman if the parents' surnames are the same or if the child's and father's surnames are the same and the mother's current surname cannot be obtained from the informant item of the birth certificate. A birth is classified as occurring to an unmarried woman if the father's name is missing, if the parents' surnames are different, or if the father's and child's surnames are different and the mother's current surname is missing.

Because of the continued increase in all measures of nonmarital childbearing in 1988, the intensive evaluation of the national data performed in 1985, 1986, and 1987 was repeated in 1988. There has been continuing concern

SECTION 4 — TECHNICAL APPENDIX — PAGE 7

Table A. Areas reporting selected items on the live-birth certificate: Each State, 1988

| Area                 | Educational attainment of parents | Dates of last live birth and last other termination | Number of prenatal visits | Marital status of mother | 1-minute Apgar score | 5-minute Apgar score | Ethnic origin  | Hispanic origin |

## SECTION 4 — TECHNICAL APPENDIX — PAGE 8

that the current method, incorporating data based on a comparison of surnames, might overstate the number of births to unmarried women. This is because births to women who have retained their maiden surnames as their legal surnames after marriage would be classified as births to unmarried women. This is more frequently associated with older professional women. The evaluation included comparisons of trends in all measures of births to unmarried mothers in States with a marital status item on the birth certificate with those States providing inferential data based on a comparison of surnames. Comparisons were made for white and black births separately and by age of mother. The results were remarkably similar for both data sets. Nonmarital births increased at virtually the same rate for white and black women and for the various age-of-mother groups.

No adjustments are made during the data processing for errors in the reporting of marital status on the birth records of the 42 reporting States and the District of Columbia because the extent of this reporting problem is unknown. When marital status is not stated on the birth certificate of a reporting area, the mother is considered married.

When births to unmarried women are reported as second or higher order births, it is not known whether the mother was previously married or unmarried when the deliveries occurred, because her marital status at the time of these earlier births is not available from the birth record.

Rates for 1940 and 1950 are based on decennial census counts. In this volume, rates for 1955–88 are based on a smoothed series of population estimates (9). Because of sampling error, the original U.S. Bureau of the Census population estimates fluctuate erratically from year to year; therefore, they have been smoothed so that the rates do not show similar variations. The rates shown in this volume differ from those published in issues of *Vital statistics of the United States* before 1969, which were based on the original estimates provided annually by the U.S. Bureau of the Census. Birth rates by marital status for 1971–79 have been revised and differ from rates published before 1980 in issues of *Vital statistics of the United States* (see “Computation of rates and other measures”).

### Place of delivery and attendant at birth

Births occurring in hospitals, institutions, clinics, centers, or homes are included in the category “In hospital.” In this context, the word “homes” does not refer to the mother’s residence but to an institution, such as a home for unwed mothers. Beginning in 1975, the attendant at birth and place of delivery items were coded independently, primarily to permit the identification of the person in attendance at hospital deliveries. Tables 1–37 and 1–38 of this report present this more detailed information for the years 1975–88.

Data shown in this volume for the “In hospital” category for the years 1975–88 include all births in clinics or maternity centers; regardless of the attendant. Data for 1975–77 published before 1980 included clinic and center births in the

category “In hospital” only when the attendant was a physician. Data shown for 1975–77 in tables 1–37 and 1–38, therefore, differ from data published before 1980. As a result of this change, for 1975 an additional 12,352 births are now classified as occurring in hospitals, raising the percent of births occurring in hospitals from 98.7 to 99.1 percent. Similarly, for 1976 the number of births occurring in hospitals is increased by 14,133 and the percent in hospitals raised from 98.6 to 99.1 percent; for 1977, the increase is 15,937 and the percent in hospitals raised from 98.5 to 99.0 percent. For 1974 and earlier, the “In hospital” category includes all births in hospitals or institutions and births in clinics, centers, or maternity homes only when attended by physicians.

For births occurring outside of hospitals, separate classifications are shown for physicians, midwives, and “Other” attendants. The “Out-of-hospital” category also includes births for which no information is reported on place of birth. Before 1975, the category “In hospital” included births for which the stated place of birth was a “doctor’s office” and delivery was by a physician. Beginning in 1975, births that were delivered by physicians in a “doctor’s office” were tabulated as “Not in hospital” and included with births delivered by physicians in this category. Although the actual number of such births is unknown, the effect of the change is minimal. In 1974, 0.3 percent of all births were delivered by physicians outside of hospitals; in 1975 this proportion was 0.4 percent.

Babies born on the way to or on arrival at the hospital are classified as having been born in the hospital. This may account for some of the hospital births not delivered by physicians or midwives.

The percent distributions by attendant at birth for 1975–81 shown in table 1–38 have been revised to exclude births for which the attendant was unspecified. In recent years, the number of births with unspecified attendant has fluctuated substantially. Excluding these births from the percent distributions allows for a more meaningful year-to-year comparison in the proportion of births for each specified attendant.

### Birth weight

Birth weight is reported in some areas in pounds and ounces rather than in grams. However, the metric system has been used in tabulating and presenting the statistics to facilitate comparison with data published by other groups.

The categories for birth weight were changed in 1979 to be consistent with the recommendations in the *Ninth Revision of the International Classification of Diseases (ICD-9)*. The revised categories in gram intervals and their equivalents in pounds and ounces are as follows:

|                     |   |                      |
|---------------------|---|----------------------|
| Less than 500 grams | = | 1 lb 1 oz or less    |
| 500 - 999 grams     | = | 1 lb 2 oz- 2 lb 3 oz |
| 1,000-1,499 grams   | = | 2 lb 4 oz- 3 lb 4 oz |
| 1,500-1,999 grams   | = | 3 lb 5 oz- 4 lb 6 oz |
| 2,000-2,499 grams   | = | 4 lb 7 oz- 5 lb 8 oz |
| 2,500-2,999 grams   | = | 5 lb 9 oz- 6 lb 9 oz |

## SECTION 4 — TECHNICAL APPENDIX — PAGE 9

|                     |         |                        |
|---------------------|---------|------------------------|
| 3,000–3,499         | grams = | 6 lb 10 oz– 7 lb 11 oz |
| 3,500–3,999         | grams = | 7 lb 12 oz– 8 lb 13 oz |
| 4,000–4,499         | grams = | 8 lb 14 oz– 9 lb 14 oz |
| 4,500–4,999         | grams = | 9 lb 15 oz– 11 lb 0 oz |
| 5,000 grams or more | =       | 11 lb 1 oz or more     |

The ICD-9 defines low birth weight as less than 2,500 grams. This is a shift of 1 gram from the previous criterion of 2,500 grams or less, which was recommended by the American Academy of Pediatrics in 1935 and adopted by the World Health Organization in the Sixth Revision of the International Lists of Diseases and Causes of Death.

After data classified by pounds and ounces are converted to grams, median weights are computed and rounded before publication. To establish the continuity of class intervals needed to convert pounds and ounces to grams, the end points of these intervals are assumed to be half an ounce less at the lower end and half an ounce more at the upper end. For example, 2 lb 4 oz–3 lb 4 oz is interpreted as 1 lb 3 1/2 oz–3 lb 4 1/2 oz.

Births for which birth weight is not reported are excluded from the computation of percents and medians.

### Period of gestation

The period of gestation is defined as beginning with the first day of the last normal menstrual period (LMP) and ending with the day of the birth. The LMP is used as the initial date because it can be more accurately determined than the date of conception, which usually occurs 2 weeks after the LMP.

Births occurring before 37 weeks of gestation are considered “preterm” or “premature” for purposes of classification. At 37–41 weeks’ gestation, births are considered “term,” and at 42 weeks and over, “postterm.” These distinctions are according to the ICD-9 definitions.

Before 1981, the period of gestation was computed only when there was a valid month, day, and year of LMP. However, length of gestation could not be determined from a substantial number of live birth certificates each year because the day of LMP was missing. Beginning in 1981 weeks of gestation have been imputed for records with missing day of LMP when there is a valid month and year. Each such record is assigned the gestational period in weeks of the preceding record that has a complete LMP date with the same computed months of gestation and the same 500-gram birth weight interval. The effect of the imputation procedure is to increase slightly the proportion of premature births and to lower the proportion of births at 39, 40, 41, and 42 weeks of gestation. A more complete discussion of this procedure and its implications is presented in a previous report (10).

The calculated period of gestation in completed weeks is edited for upper and lower limits. If the interval between date of LMP and date of birth is 16 weeks or less, or 53 weeks or more, the period of gestation is considered not stated.

Because of post-conception bleeding or menstrual irregularities, the presumed date of LMP may be in error.

In these instances the computed gestational period may be longer or shorter than the true gestational period, but the extent of such errors is unknown.

### Month of pregnancy prenatal care began

For those records in which the name of the month is entered for this item, instead of first, second, third, and so forth, the month of pregnancy in which prenatal care began is determined from the month named and the month last normal menses began. For these births, if the item “Date last normal menses began” is not stated, the month of pregnancy in which prenatal care began is tabulated as not stated.

### Number of prenatal visits

Tabulations of the number of prenatal visits were presented for the first time in 1972. In 1988 these data were collected from the birth certificates of all States except California.

### Apgar score

One- and 5-minute Apgar scores were added to the U.S. Standard Certificate of Live Birth in 1978 to evaluate the condition of the newborn infant at 1 and 5 minutes after birth. The Apgar score is a useful measure of the need for resuscitation and a predictor of the infant’s chances of surviving the first year of life. It is a summary measure of the infant’s condition based on heart rate, respiratory effort, muscle tone, reflex irritability, and color. Each of these factors is given a score of 0, 1, or 2; the sum of these 5 values is the Apgar score, which ranges from 0 to 10. A score of 10 is optimum, and a low score raises some doubts about the survival and subsequent health of the infant. In 1988 the 1- and 5-minute Apgar scores were included on the birth certificates of 46 States and the District of Columbia. See table A for a listing of reporting areas.

### Hispanic parentage

Concurrent with the 1978 revision of the U.S. Standard Certificate of Live Birth, the National Center for Health Statistics recommended that States add items to identify the Hispanic or ethnic origin of the newborn’s parents. Two formats were used: (1) an open-ended item to obtain the specific origin or descent of each parent, for example, Italian, Mexican, or English; and (2) an item directed toward the Hispanic population, requesting only the specific Hispanic origin (Mexican, Puerto Rican, Cuban, and so forth). In 1988 items requesting Hispanic or ethnic origin were included on the birth certificates of 30 States and the District of Columbia (see table A).

## QUALITY OF DATA

Although vital statistics data are useful for a variety of administrative and scientific purposes, they cannot be correctly interpreted unless various qualifying factors and methods of classification are taken into account. The factors to be considered depend on the specific purposes for which the data are to be used. It is not feasible to discuss all the pertinent factors in the use of vital statistics tabulations, but some of the more important ones should be mentioned.

Most of the factors limiting the use of data arise from imperfections in the original records or from the impracticability of tabulating these data in very detailed categories. These limitations should not be ignored, but their existence does not vitiate the value of the data for most general purposes.

### Completeness of registration

An estimated 99.3 percent of all births occurring in the United States in 1988 were registered; for white births registration was 99.5 percent complete and for all other births, 98.6 percent complete. These estimates are based on the results of the 1964–68 test of birth-registration completeness according to place of delivery (in or out of hospital) and race and on the 1988 proportions of births in these categories. The primary purpose of the test was to obtain current measures of registration completeness for births in and out of hospital by race on a national basis. Data for States were not available as they had been from the previous birth-registration tests in 1940 and 1950. A detailed discussion of the method and results of the 1964–68 birth-registration test is available (11).

The 1964–68 test has provided an opportunity to revise the estimates of birth-registration completeness for the years since the previous test in 1950 to reflect the improvement in registration. This has been done using registration completeness figures from the two tests by place of delivery and race. Estimates of registration completeness for four groups (based on place of delivery and race) for 1951–65 were computed by interpolation between the test results. (It was assumed that the data from the more recent test are for 1966, the midpoint of the test period.) The results of the 1964–68 test are assumed to prevail for 1966 and later years. These estimates were used with the proportions of births registered in these categories to obtain revised numbers of births adjusted for underregistration for each year. The overall percent of birth-registration completeness by race then was computed. The figures for 1951–68 shown in table 1–21 differ slightly from those shown in annual reports for years prior to 1969.

Data adjusted for underregistration for 1951–59 shown in tables 1–1, 1–3, 1–4, 1–6, and 1–8 have been revised to be consistent with the 1964–68 test results and differ slightly from data shown in annual reports for years before 1969. For these years the published number of births and

birth rates for both racial groups have been revised slightly downward because the 1964–68 test indicated that previous adjustments to registered births were slightly inflated. Because registration completeness figures by age of mother and by live-birth order are not available from the 1964–68 test, it must be assumed that the relationships among these variables have not changed since 1950.

*Discontinuation of adjustment for underregistration, 1960*—Adjustment for underregistration of births was discontinued in 1960, when birth registration for the United States was estimated to be 99.1 percent complete. This removed a bias introduced into age-specific rates when adjusted births classified by age were used. Age-specific rates are calculated by dividing the number of births to an age group of mothers by the population of women in that age group. Tests have shown that population figures are likely to be understated through census undercounts; these errors compensate for underregistration of births. Adjustment for underregistration of births, therefore, removes the compensating effect of underenumeration, biasing the age-specific rates more than when uncorrected birth and population data are used. (For further details, see *Vital statistics of the United States, 1963*, volume I, page 4–11.)

The age-specific rates used in the cohort fertility tables (tables 1–12 through 1–19) are an exception to the above statement. These rates are computed from births corrected for underregistration and population estimates adjusted for underenumeration and misstatement of age. Adjusted births and population estimates are used for the cohort rates because they are an integral part of a series of rates, estimated with a consistent methodology. It was considered desirable to maintain consistency with respect to the cohort rates, even though it means that they will not be precisely comparable with other rates shown for 5-year age groups.

### Quality control procedures

States in the Vital Statistics Cooperative Program are required to have an error rate of less than 2.0 percent for each item for 3 consecutive data months during the initial qualifying period. Once a State is qualified, the National Center for Health Statistics (NCHS) monitors the quality of data received through independent verification of a sample of records to ensure that the item error rate is not more than approximately 4 percent. In addition, there is verification at the State level before NCHS is sent the data.

After completion of coding, counts of the taped records are balanced against control totals for each shipment of records from a registration area. Impossible codes are eliminated during the editing processes on the computer and corrected on the basis of reference to the source record or adjusted by arbitrary code assignment. All subsequent operations involved in tabulation and table preparation are verified during the computer processing or by statistical clerks.

### Small frequencies

The numbers of births reported for an area represent complete counts. As such, they are not subject to sampling error, although they are subject to errors in the registration process. However, when the figures are used for analytical purposes, such as the comparison of rates over a time period or for different areas, the number of events that actually occurred may be considered one of a large series of possible results that could have arisen under the same circumstances. The probable range of values may be estimated from the actual figures according to certain statistical assumptions.

In general, distributions of vital events may be assumed to follow the binomial distribution. Estimates of standard errors and tests of significance under this assumption are described in most standard statistics texts. When the number of events is large, the standard error, expressed as a percent of the number or rate, usually is small.

When the number of events is small (perhaps fewer than 100) and the probability of such an event is small, considerable caution must be observed in interpreting the conditions described by the figures. Events of rare nature may be assumed to follow a Poisson probability distribution. For this distribution, a simple approximation may be used to estimate the error as follows:

If  $N$  is the number of births and  $R$  is the corresponding rate, the chances are 19 in 20 that

1. The "true" number of events lies between

$$N - 2\sqrt{N} \text{ and } N + 2\sqrt{N}$$

2. The "true" rate lies between

$$R - 2\frac{R}{\sqrt{N}} \text{ and } R + 2\frac{R}{\sqrt{N}}$$

If the rate  $R_1$  corresponding to  $N_1$  events is compared with the rate  $R_2$  corresponding to  $N_2$  events, the difference between the two rates may be regarded as statistically significant at the 0.05 level if it exceeds

$$2\sqrt{\frac{R_1^2}{N_1} + \frac{R_2^2}{N_2}}$$

For example, suppose that the observed birth rate for area A was 15.0 per 1,000 population and that this rate was based on 50 recorded births. Given prevailing conditions, the chances are 19 in 20 that the "true" or underlying birth rate for that area lies between 10.8 and 19.2 per 1,000 population. Let it be further supposed that the birth rate for area A of 15.0 per 1,000 population is being compared with a rate of 20.0 per 1,000 population for area B, which is based on 40 recorded births. Although the difference between the rates for the two areas is 5.0, this difference is less than twice the standard error of the difference

$$2\sqrt{\frac{(15.0)^2}{50} + \frac{(20.0)^2}{40}}$$

of the two rates that is computed to be 7.6. From this, it is concluded that the difference between the rates for the two areas is not statistically significant.

## COMPUTATION OF RATES AND OTHER MEASURES

### Population bases

The rates shown in this report were computed on the basis of population statistics prepared by the U.S. Bureau of the Census. Rates for 1940, 1950, 1960, 1970, and 1980 are based on the population enumerated as of April 1 in the censuses of those years. Rates for all other years are based on the estimated midyear (July 1) population for the respective years. Birth rates for the United States, individual States, and standard metropolitan statistical areas (SMSA's) are based on the total resident populations of the respective areas. Except as noted, these populations exclude the armed forces abroad but include the armed forces stationed in each area.

The resident population of the birth- and death-registration States for 1900–32 and for the United States for 1900–88 is shown in table 4-1. In addition, the population including armed forces abroad is shown for the United States. Table B shows the sources for these populations.

*Population estimates for 1981–88*—The population of the United States by age, race, and sex for 1988 is shown in table 4-2. The population for each State is shown in table 4-3; the monthly population figures were published in *Current population reports*, series P-25, number 1045. Comparable data for the U.S. population by age, race, and sex and for the State populations for 1981–87, were shown, respectively, in tables 4-2 and 4-3 of *Vital statistics of the United States*, volume I, for those years. Comparable monthly population data for 1981–87 were shown in *Current population reports*, series P-25, numbers 931, 949, 961, 980, 1001, 1021, and 1023. Population data by race are consistent with the modified 1980 populations by race.

*Populations for 1980*—The population of the United States by age, race, and sex, and the population for each State are shown in tables 4-2 and 4-3 of *Vital statistics of the United States, 1980*, volume I. The figures by race have been modified as described below. Monthly population figures were published in *Current population reports*, series P-25, number 899.

The racial counts in the 1980 census are affected by changes in racial reporting practices, particularly by the Hispanic population, and in coding and classifying racial groups in the 1980 census. One particular change has created a major inconsistency between the 1980 census data and historical data series, including censuses and vital statistics. About 40 percent of the Hispanic population counted in 1980, over 5.8 million persons, did not mark one of the specified races listed on the census questionnaire but instead marked the "Other" category. In the 1980 census, coding procedures

were modified for persons who marked "Other" race and wrote in a national origin designation of a Latin American country or a specific Hispanic origin group in response to the racial question. These persons remained in the "Other" racial category in 1980 census data; in previous censuses and in vital statistics such responses were almost always coded into the "White" category.

To maintain comparability, the "Other" racial category in the 1980 census was reallocated to be consistent with previous procedures. Persons who marked the "Other" racial category and reported any Spanish origin on the Spanish origin question (5,840,648 persons) were distributed to white and black races in proportion to the distribution of persons of Hispanic origin who reported their race to be white or black. This was done for each age-sex group.

As a result of this procedure, 5,705,155 persons were added to the white population and 135,493 persons to the black population. Persons who marked the "Other" racial category and reported that they were not of Spanish origin (916,338 persons) were distributed as follows: 20 percent in each age-sex group were added to the "Asian and Pacific Islander" category (183,268 persons), and 80 percent were added to the "White" category (733,070 persons). The count of American Indians, Eskimos, and Aleuts was not affected by these procedures. Unpublished tabulations of these modified census counts were obtained from the U.S. Bureau of the Census and used to compute the 1980 rates for this report, except for tables 1-12 through 1-19.

*Population estimates for 1971-79*—Birth rates for 1971-79 (except those for cohorts of women in tables 1-12 through 1-19) have been revised, based on revised population estimates that are consistent with the 1980 census levels, and thus may differ from rates published in volumes of *Vital statistics of the United States* for these years. The 1980 census counted approximately 5.5 million more persons than had earlier been estimated for April 1, 1980 (12). The revised estimates for the United States by age, race, and sex were

published by the U.S. Bureau of the Census in *Current population reports*, series P-25, number 917. Population estimates by month are based on data published in *Current population reports*, series P-25, number 899. Unpublished revised estimates for States were obtained from the U.S. Bureau of the Census.

*Population estimates for 1961-69*—Birth rates in this volume for 1961-69 (except for those shown in table 1-4 and 1-5) are based on revised estimates of the population and thus may differ slightly from rates published before 1976. The revised estimates used in computing these rates were published in *Current population reports*, series P-25, number 519. The rates shown in tables 1-4 and 1-5 for 1961-64 are based on revised estimates of the population published in *Current population reports*, series P-25, numbers 321 and 324, and may differ slightly from rates published in those years.

*Population estimates for 1951-59*—Final intercensal estimates of the population by age, race, and sex and total population by State for 1951-59 are shown in tables 4-4 and 4-5 of *Vital statistics of the United States, 1966*, volume I. Beginning with 1963 these final estimates have been used to compute birth rates for 1951-59 in all issues of *Vital statistics of the United States*.

Net census undercounts and overcounts

The U.S. Bureau of the Census has conducted extensive research to evaluate the coverage of the U.S. population (including undercount and overcount and misstatement of age, race, and sex) in the last four decennial censuses—1950, 1960, 1970, and 1980. These studies provide estimates of the national population that was not enumerated or over-enumerated in the respective censuses, by age, race, and sex (13-15). The report for 1980 (15) includes estimates of net underenumeration and overenumeration for age, sex,

SECTION 4 — TECHNICAL APPENDIX — PAGE 13

and racial subgroups of the national population, modified for race consistency with previous population counts as described in the section "Populations for 1980."

These studies indicate that there is differential coverage in the censuses among the population subgroups; that is, some age, race, and sex groups are more completely enumerated than others. To the extent that these estimates of overcounts or undercounts are valid, that they are substantial, and that they vary among subgroups and geographic areas, census miscounts can have consequences for vital statistics measures (13). However, the effects of undercounts in the census are reduced to the extent that there is underregistration of births. If these two factors are of equal magnitude, rates based on the unadjusted populations are more accurate than those based on adjusted populations because the births have not been adjusted for underregistration.

The impact of net census miscounts on vital statistics measures includes the effects on levels of the rates and effects on differentials among groups.

If adjustments were made for persons who were not counted in the census of population, the size of the denominators generally would increase and the rates would be smaller than without an adjustment. Adjusted rates for 1980 can be computed by multiplying the reported rates by ratios of the 1980 census-level population adjusted for the estimated net census miscounts, which are shown in table C. A ratio of less than 1.0 indicates a net census undercount and would result in a corresponding decrease in the rate. A ratio in excess of 1.0 indicates a net census overcount and would result in a corresponding increase in the rate.

Enumeration of white females in the childbearing ages was at least 99 percent complete for all ages. Among women of races other than white, the undercount was as high as 4 percent. Generally, females in the childbearing ages were more completely enumerated than males for similar race-age groups.

If vital statistics measures were calculated with adjustments for net census miscounts for each of these subgroups, the resulting rates would have been differentially changed from their original levels; that is, rates for those groups with the greatest estimated overcounts or undercounts would show the greatest relative changes due to these adjustments. Thus the racial differential in fertility between the white and the "All other" population can be affected by such adjustments.

Cohort fertility tables

The various fertility measures shown for cohorts of women in tables 1-12 through 1-19 are computed from births adjusted for underregistration and population estimates corrected for underenumeration and misstatement of age. The data shown in this volume are not consistent with data published in annual reports before 1974. These data use revised population estimates prepared by the U.S. Bureau of the Census and have been expanded to include data for the two major racial groups. Heuser has prepared a detailed description of the methods used in deriving these measures as well as more detailed data for earlier years (16).

Age-sex-adjusted birth rates

The age-sex-adjusted birth rates shown in table 1-3 are computed by the direct method. The age distribution of women aged 10-49 years as enumerated in 1940 and the total population of the United States for that year are used as the standard populations. The birth rates by age of mother and race that are used to compute these adjusted rates are shown in table 1-6. The age-sex-adjusted birth rates show differences in the level of fertility independent of differences in the age and sex composition of the popula-

Table C. Ratio of census-level resident population to resident population adjusted for estimated net census undercount, by age, race, and sex: United States, April 1, 1980

## SECTION 4 — TECHNICAL APPENDIX — PAGE 14

tion. It is important *not* to confuse these adjusted rates with the crude rates shown in other tables.

$$\text{Percent at } N \text{ parity} = \frac{(\text{cum. rate, order } N) - (\text{cum. rate, order } N + 1)}{10}$$

### Total fertility rate

The total fertility rate is the sum of the birth rates by age of mother (in 5-year age groups) multiplied by 5. It is an age-adjusted rate because it is based on the assumption that there are the same number of women in each age group. In table 1-6 the rate of 1,932 in 1988, for example, means that if a hypothetical group of 1,000 women were to have the same birth rates in each age group that were observed in the actual childbearing population in 1988, they would have a total of 1,932 children by the time they reached the end of the reproductive period (assumed for purposes of these calculations to be age 50 years), assuming that all of the women survived to that age.

### Intrinsic vital rates

The intrinsic vital rates shown in table 1-5 are calculated from a stable population. A stable population is that hypothetical population, closed to external migration, that would become fixed in age-sex structure after repeated applications of a constant set of age-sex-specific birth and death rates. For the mathematical derivation of intrinsic vital rates, see *Vital statistics of the United States, 1962*, volume I, pages 4-13 and 4-14. The technique of calculating intrinsic vital rates is described by Barclay (17).

### Parity distribution

The percent distribution of women by parity (number of children ever born alive to mother) shown in tables 1-13 and 1-17 is derived from cumulative birth rates by order of birth, shown in tables 1-15 and 1-19. The percent of zero-parity women is found by subtracting the cumulative first-birth rate from 1,000 and dividing by 10. The proportions of women at parities one through six are found from the following formula:

The percent of women at seventh and higher parities is found by dividing the cumulative rate for seventh-order births by 10.

### Seasonal adjustment of rates

The seasonally adjusted birth and fertility rates shown in table 1-23 are computed from the X-11 variant of Census Method II (18). This method of seasonal adjustment used since 1964 differs slightly from the U.S. Bureau of Labor Statistics (BLS) Seasonal Factor Method, which was used for *Vital statistics of the United States, 1964*. The fundamental technique is the same in that it is an adaptation of the ratio-to-moving-average method. Before 1964 the method of seasonal adjustment was based on the X-9 variant and other variants of Census Method II. A comparison of Census Method II with the BLS Seasonal Factor Method shows the differences in the seasonal patterns of births to be negligible.

### Computation of percents, medians, and means

Percent distributions, medians, and means are computed using only events for which the characteristic is reported. The "Not stated" category is subtracted from the total before computation of these measures.
