Table 1-86. Percent Low Birth Weight by Marital Status of Mother, Age of Mother, Live-Birth Order, and Race of Child: United States, 1988

[Live-birth order refers to number of children born alive to mother. Low birth weight is defined as weight of less than 2,500 grams (5 lb 8 oz). For 42 States and the District of Columbia, marital status of mother is reported on the birth certificate, and for 8 States, mother's marital status is inferred from other items on the birth certificate; see Technical Appendix. Figures for marital status not classifiable are included in births to married women]
