

Miller, Diane M. (CDC/NIOSH/EID)

From: George Walton [g.c.walton@reactives.com]
Sent: Monday, October 05, 2009 1:01 PM
To: NIOSH Docket Office (CDC)
Subject: Docket 192

Discussions that would help me:

1. End-user benefits of respirator certification training sessions.
2. Color coding elements for filters: Especially changes or up dates to the ANSI specification; put the color codes in a table in 29 CFR 1910.134 where they used to be.
3. Differences between surgical masks and N95s: especially methods of manufacture and identification features
4. What does NIOSH think of / how does NIOSH use ANSI F-739 and F-1001?
 - a. Permeation issues and breakthrough times – what they really mean.
