Just as a thought--I feel that if you only survey truck stops, you will only be getting an over the road driver survey. It will be very limited to the type of work they do. It may be regional/long haul but you will not be getting the "local" driver. Many of these do not get to stop at truck stops, they usually will stop at a convenience store or someplace else they can park their rig. Maybe mailing the survey?maybe there would be more honesty about problems that are not wanted to be known while filling out a form from someone from the FMCSA?
