

She thinks  
**“Pertussis”**  
is something you play  
in music class.

**Childhood vaccinations  
keep it that way**

**Pertussis** isn't a drum, it's a very contagious bacterial infection of the lungs. Also known as whooping cough, pertussis can cause pneumonia, seizures, and brain damage. Childhood vaccinations continue to help protect kids from pertussis. Let's keep it that way.

**Talk to your child's healthcare  
provider about keeping up to date  
with childhood vaccinations.**
